

HELPING YOU BUILD
Your Dream Home
ONE LOG AT TIME

• MCLH •

Our mission statement

We believe that building a home is not a process but a partnership. Our expert designers, engineers, architects, and artisans work closely with you in developing a home that suits your lifestyle, needs, and budget. Whether your starting point is one of our sample plans or a hand drawn sketch, our interactive design process is structured to assure that the final product is exactly what you want. Our team is committed to creating a superior experience for each of our clients.

MCLH CATALOG / 2021

About Moosehead CEDAR LOG HOMES

We are a family owned business with over 30 years of experience. Moosehead Cedar Log Homes (MCLH) was founded by a Northern Maine lumberman who saw the production deficiencies in other manufacturers. Being a good Mainer he figured "If you want it done right, do it yourself" so he began producing log home kits in 1986 along the shores of Moosehead Lake In Greenville, Maine, where we still stand today. In 1996 Randy & Lucy Comber purchased MCLH and manufactured every home with the same level of care and quality that spurred the creation of MCLH back in 1986. In 2001 MCLH became a member of the Pleasant River Lumber family through their purchase of MCLH. This acquisition by Pleasant River Lumber continues its' heritage of producing superb quality log homes, with a "Made in Maine" advantage.

CRAFTING YOUR DREAM HOME

WITH OUR TEAM, PRODUCTS & PROCESSES

We begin by listening...

Great homes begin with great designs. Our team will discuss your needs, listen to your ideas, help you select, modify, or create your very own floor plans, transforming your ideas into your dream home.

“As owner/builder it was an absolute pleasure dealing with Moosehead Cedar Log Homes. From the selection process of our log home design, to changes, nothing was a problem. Every aspect was dealt with professionalism. We would recommend to anyone looking for the log home experience to contact the team at Moosehead Cedar Log Homes.”

• MCLH •

Customization

“Oh I love the Tahoe layout but I wish that the fireplace was more central to the home.”

When comments like the one above are made, we have a solution. Our team can create a custom designed home for you.

Often we find people will use our floor plans as the base design but want to move different structural elements around. The great news is we can do that, the better news is the design team will make your desired modifications in a timely fashion, for your review.

As you browse this catalog if you see a design you want modified, give us a call to set up a design consultation. We would be thrilled to help.

* Since we customize our homes some photos of our plans might include details that are custom to that home. We did our best to be accurate but what can we say, we do a lot of custom homes.

• MCLH •

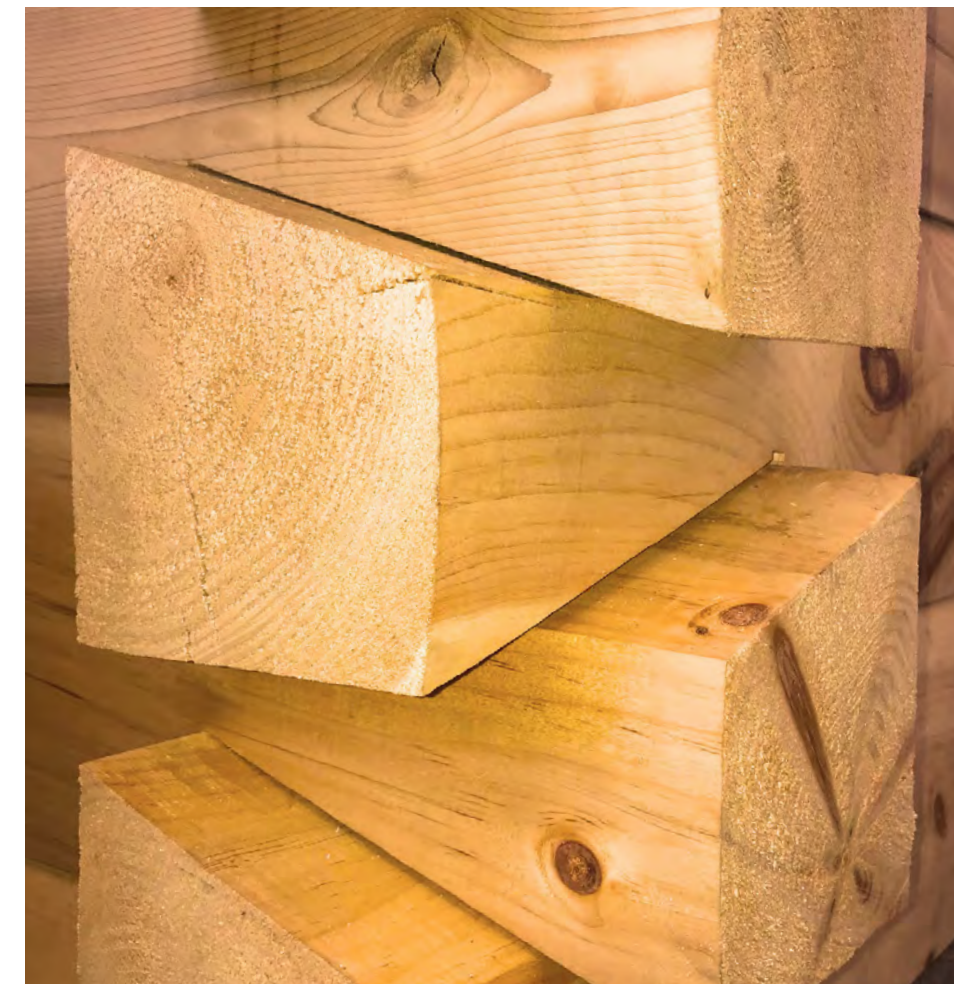

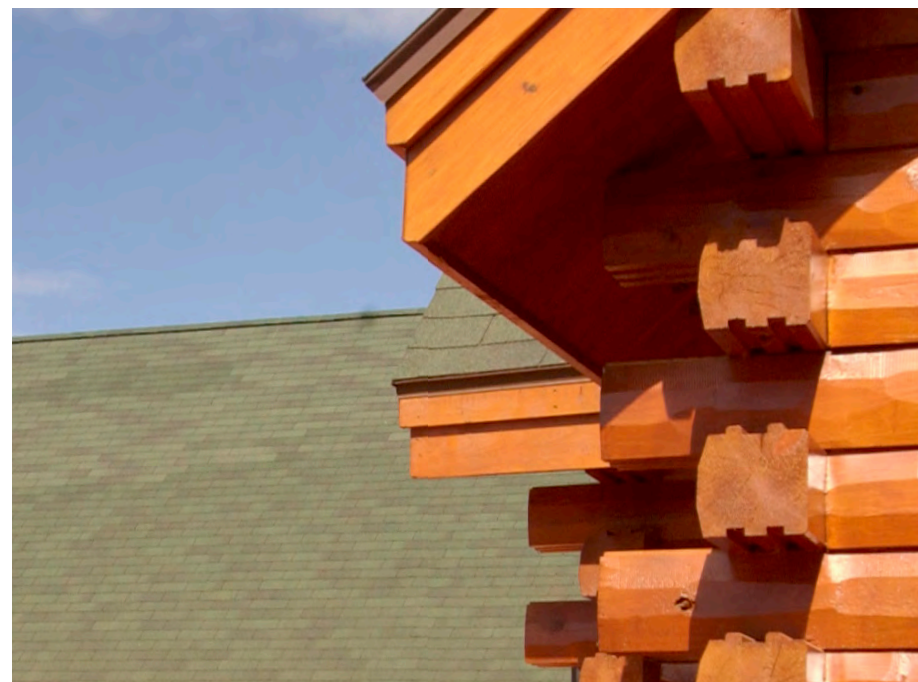

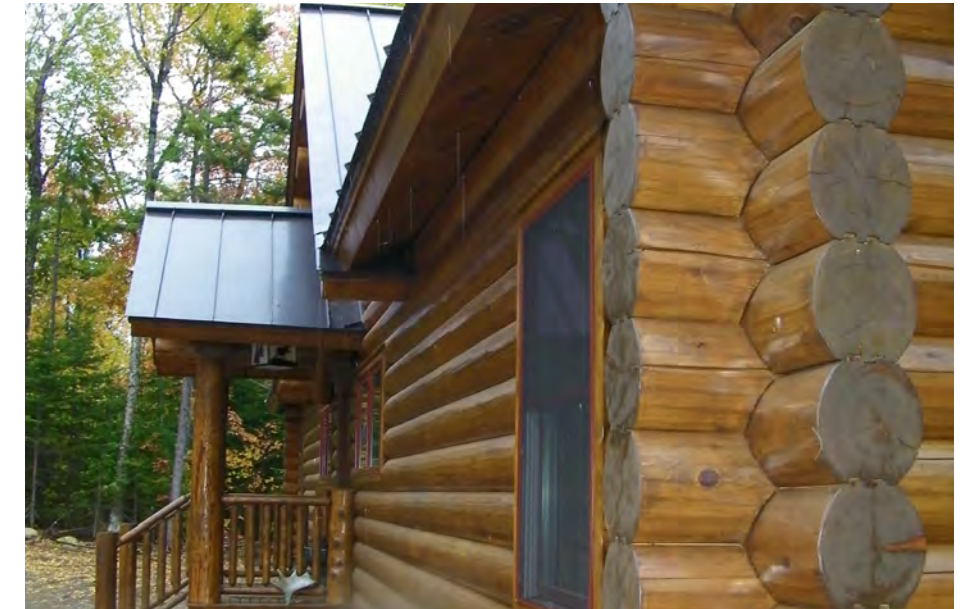

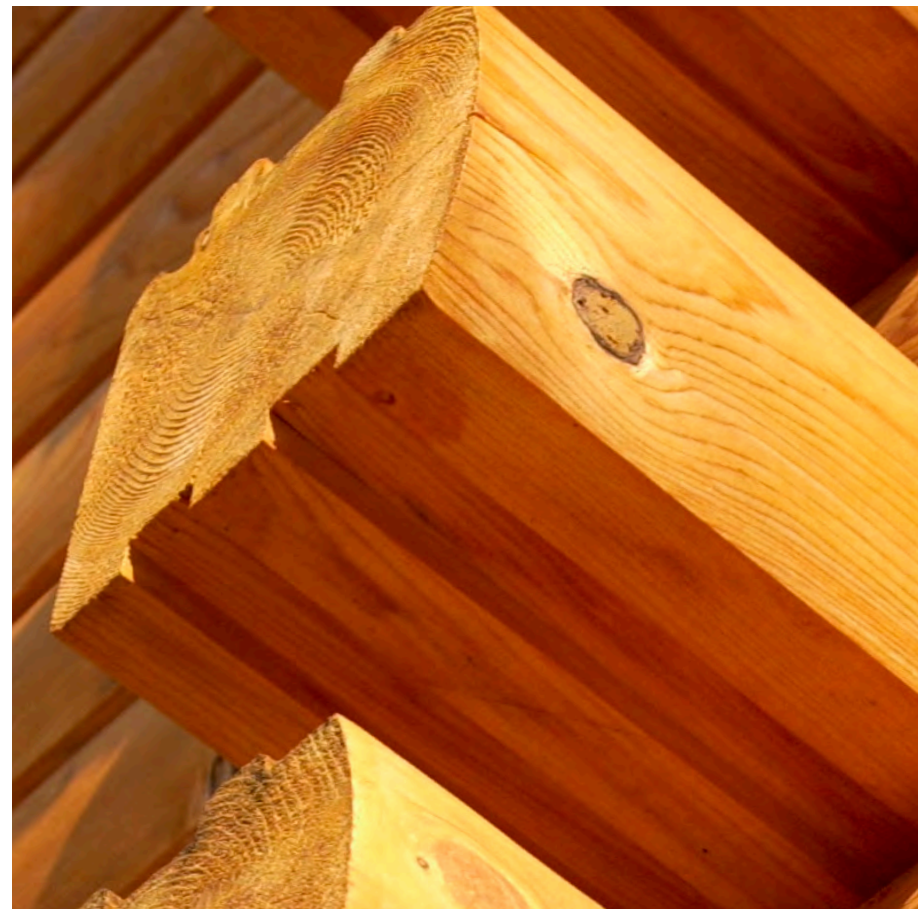

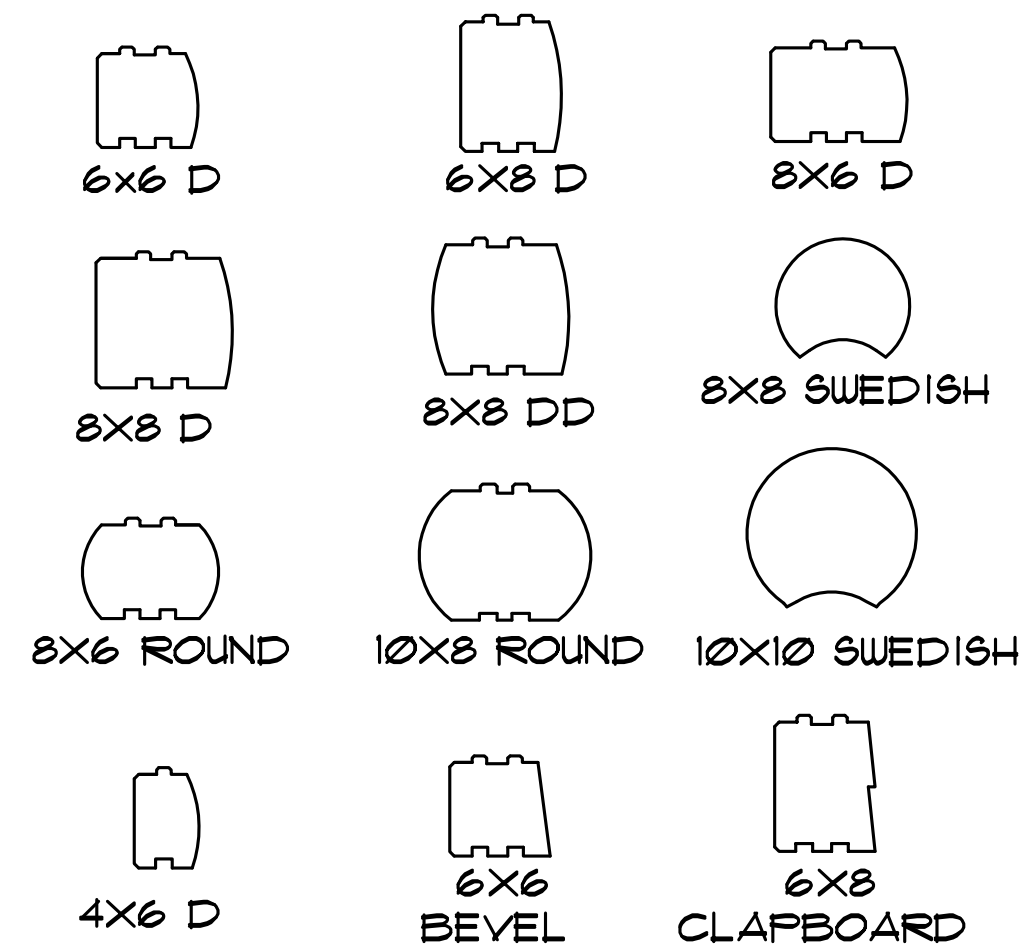

“...love the house and show it to everyone—we are proud of our home. Thank you for all your help. It has been a pleasure working with you. P.S. Thanks for helping make our dream come true.”

Jon & D Westmoreland, Westmoreland, NH

Log Profiles

As the saying goes “Design is in the details”. That is no different in a cedar log home. The size of the logs your home is built with, along with the cut and finishes, make a great impact on the overall design. Which is why MCLH has developed unique log profiles for you to choose from. Giving you all the options you need to make sure your new home is your dream home:

“Our logs come from the finest white cedar stands in the northern regions surrounding Maine”

WHY CEDAR:

Cedar is one of the highest quality, structurally stable and durable woods used in today's log home construction. Durability attained from natural preservatives in the wood that repel insects, along with a closed cellular structure that inhibit mold and decay. The stability of our cedar is a result of our air drying process that balances moisture content, minimizing and warping or shrinking.

Our cedar log homes are roughly 15-20% more energy efficient than a standard “stick-built” home. Efficiency is achieved through our non-settling system that provides 4 points of protection from airflow and drafting:

1. Perfect fit milling
2. Double tongue and groove
3. “Log Hog” securing
4. Foam & caulk sealed courses

**Increased energy efficiency can be achieved by utilizing one of our optional Insulation Packages. This allows you to determine the level of energy efficiency your log home will provide, based on your individual needs.

CHOOSING YOUR DREAM HOME

OUR MODELS

See all of our standard models and learn much, much, much more at www.mclh.net

Home Collections

To ensure we're offering a solution to meet everyone's needs and budgets we've developed four different kit types that help the home owner choose what is right for them.

Maine Collection

The "Maine Collection" offers the finest quality components, including our "Premium-grade" Northern White Cedar wall logs, in a variety of profiles and sizes. The distinctive appearance touches continue, based on model, with features such as Round or

Square - purlins, ceiling joists, stair assemblies and cedar railings, Andersen "400 Series" windows and patio doors, architectural shingles and more. All of these features and others combine to create your beautiful and breath-taking "Maine Collection" log home.

Learn More...

To view all of our standard Log Home Designs, get ideas to incorporate in to your very own Custom-Design, or to learn more about our specific "Collections" materials package content options, please visit our website – www.mclh.net

And remember, just as ALL of our plans are customizable to meet your specific desires, so too, are our materials packages. You can provide us with your very own design, modify one of our standard models, a little or a lot, and mix and match package content, to design that truly unique Log Home that you and your Family have always dreamed of!

Woodlands Collection

The "Woodlands Collection" is designed for those Log Home Enthusiasts who desire the security, comfort and joy of Log Home living, but are more budget-minded. This collection incorporates quality components, including our "Rustic-grade" Northern White Cedar wall logs, in a variety of profiles

and sizes. The standard package content, based on model, features conventionally framed roof systems, Round or Square - ceiling joists, stair assemblies and cedar railings, Andersen "200 Series" windows and patio doors, 25-year shingles and more. All of these features result in a beautiful and economical log home.

Wilderness Collection

The "Wilderness Collection" is designed for the Outdoors enthusiast. This collection incorporates quality components, including our "Rustic-grade" Northern White Cedar wall logs, in a variety of profiles and sizes. The standard package content, features conventionally

framed roof systems, Andersen "200 Series" windows and patio doors, 25-year shingles and more. These components are selected and combined to result in a recreational cottage or cabin, that can be easily transported, erected and enjoyed in a private, remote setting.
